Professor Lam Kin-che
Ir Otto Poon
Representative from Environmental Protection Department
Representative from Economic Development and Labour
Bureau
Representative from Transport Department

Mr Chandran Nair (co-opted Member)

Terms of reference –

- (a) To study the current state of air quality in Hong Kong, the committed action programme and constraints encountered, in connection with associated contributing factors and policy areas, with a view to presenting a comprehensive picture on relevant issues.
- (b) To identify key issues relevant to Hong Kong's long-term sustainability, in particular the interface between other integrated contributing factors and the air quality.
- (c) To identify scope for a public engagement process to facilitate the community to contribute their views, including choices that have to be made by the community in order to achieve a clean living environment.
- (d) To identify possible areas that the Government, businesses, civil sector and every single member of the society may work on further to contribute to a clean living environment.
